Experience

Frontend Developer Internship | [Certificate](#)

Jul 2024 - Sep 2024

Frontend Simplified

- Enhanced a static HTML, CSS, JavaScript, and React single-page application by adding animations, transitions, and carousels to improve user engagement and interface interactivity.
- Integrated Axios for handling API requests, enabling dynamic data display from a cloud server, with features like skeleton loading states, pagination, and dynamic routing.
- Collaborated in a virtual team environment using Git for version control and GitHub for project management.

Freelance Frontend Developer

May 2024 - Current

Self Employed

- Delivered five professional websites using HTML5, CSS3 (SCSS, BEM), JavaScript, and React, adhering to best practices for modern web development.
- Improved site performance by implementing image compression, caching, and lazy loading, which resulted in faster load times and a better user experience.
- Provided comprehensive SEO support, responsive design, and hosting solutions, ensuring cross-browser and multi-device compatibility for global accessibility.

Frontend Developer Support

June 2024 - Current

Frontend Simplified

- Guided over 1,000 students on mastering HTML, CSS (Flexbox), JavaScript, and React through troubleshooting and best practices.
- Used Google Chrome's inspect element tools to assist with debugging and problem-solving, helping students resolve technical issues efficiently.
- Simplified complex programming concepts, making them more accessible for learners and improving their understanding of frontend development fundamentals.

Projects

E-Commerce App | [Website](#) | [GitHub](#)

- Created an e-commerce app for a library with dynamic search, add-to-cart functionality, skeleton loading states, and sorting by price and rating. Employed React, JavaScript, HTML, and CSS to deliver a fluid, user-friendly shopping experience optimized for book browsing.

Finance SaaS Platform | [Website](#) | [GitHub](#)

- Developed a comprehensive Finance SaaS platform for tracking income, managing expenses, categorizing transactions, importing data via CSV, and connecting to bank accounts through Plaid. Used Next.js, React, Neon, Drizzle, and Hono.js to deliver a highly efficient financial management solution.

Video Conferencing App | [Website](#) | [GitHub](#)

- Built a responsive video conferencing app with features including sign-in authentication, screen sharing, live chat, meeting scheduling, and recording functionality, utilizing Next.js 14, Stream, and Tailwind CSS. Enhanced user collaboration with an interactive and well-equipped platform.
